Washer - Barrier Series

Barrier type washer-extractors from Sea-lion prevent cross contamination by providing the necessary separation between soiled and clean sides of the laundry operation with a fully enclosed frame, protective seal and interlocking control stations.

Linen to be washed is loaded on the soiled side and unloaded on the clean side once the wash cycle is complete eliminating any chance for cross contamination.

Models available in 60 and 100kg dry load capacity and in open pocket and 2-pocket drum designs.
